Expanded National Nutrition Survey: Socio Economic Component Individual Level

ENNS Management Team

Primary Investigators	Mario V. Capanzana, Ph.D. Imelda Angeles-Agdeppa, Ph.D. Charmaine A. Duante, MSc Epid (PH) Marina B. Vargas, Ph.D. † Ma. Lilibeth P. Dasco, MSAN, MDM Glen Melvin P. Gironella	Project Director (2018 and 2019) Project Director (2021) and Project Leader (2018 and 2019) Project Leader (2021) and Data Management Head Survey Operation Head (2018 and 2019) Survey Operation Head (2021) Component Study Leader (2018, 2019, & 2021)
------------------------------	---	---

Overview

Producer	Department of Science and Technology – Food and Nutrition Research Institute (DOST – FNRI)
Identification	DDI-PHL-FNRI-UPS-2018-2019-2021-SESC-v01
Version	Production Date: 2023-12
The Socio-Economic Status (SES) component of the Expanded National Nutrition Survey (ENNS) determines the socio-economic and demographic characteristics of the household members which include information on household size, occupation, and level of educational attainment. Kind of Data Sample survey data	
Unit of Analysis	Individuals

Scope & Coverage

Country	Philippines
Geographic Coverage	National, 116 Provinces/Highly Urbanized Cities (HUCs)
Population	All members of the households

Sampling

Sampling Procedure	The National Nutrition Survey (NNS) survey design was changed to become a rolling survey design and was termed as Expanded National Nutrition Survey (ENNS) in 2018. The ENNS had a wider scope of coverage and had a longer time frame of data collection to cover all 81 provinces, 33 HUCs (including 16 cities in the National Capital Region), and 3 other urban areas (Pateros, Isabela City, and Cotabato City), from 2018 to 2020. The Expanded National Nutrition Survey (ENNS) was conducted in 2018, 2019, and
---------------------------	---

	2021. It utilized a rolling sample design in which 117 Philippine Statistics Authority (PSA) domains of provinces and highly urbanized cities (HUCs) were grouped into 24 replicates having similar characteristics utilizing data from the 2010 Census of Population and Housing (CPH). Eight replicates consisting of 40 domains were independently allocated each year to generate national-level estimates. For the regional estimates, the total provinces/HUCs covered in the three periods of the ENNS were cumulated to come up with the regional level data of the different nutrition and health indicators collected in the survey. In each domain, the selection of households utilized the fully replicated design of the 2013 PSA Master Sample (MS) design. All 16 replicates consisting of MS enumeration areas (EAs) were fully covered which allows for more reliable estimates at the domain level. The number of EAs comprising each MS replicate depends on the size of the domain. In 2018, 40 provinces and HUCs were surveyed; while in 2019, only 39 provinces, HUCs, and other urban areas were covered since the Province of Sulu was not surveyed due to the peace and security concerns in the area. The 2018 and 2019 ENNS results were pooled to increase the precision for tracking trends of nutrition and health indicators. Lastly, for the third year of the ENNS that was interrupted in 2020 due to COVID-19 pandemic, 37 areas were covered from July 2021 to June 2022.
Sample Size	Total – 654,425 Covered – 470,901 Non covered – 183,524

Methodology	
Data Collection	Face-to-face interview using e-DCS and observation was conducted to collect information on the household's demographic profile.
Data Entry System	Initial editing and validation of data were performed directly in the e-DCS by the field researchers. A backup copy of the data was also submitted to the Team Leader via USB flash drive in which another round of data validation was performed. Upon online transmittal to the central database, final data editing and validation were done for all interview-based survey questions.
Data Processing and Statistical Analysis	At the DOST-FNRI, the encoded data was checked against the edited survey questionnaires. Several rounds of alternating manual and machine validations were done until the desired consistency and completeness of data were achieved. Errors or outliers found were validated with the actual entries/answers in the survey questionnaires. Errors in responses/answers were excluded. Sampling weights were computed based on the product of the base weights, non-response adjustment, and post-stratified calibration/adjustment based on the projected population counts obtained from the PSA. The application of the National Sampling Weights can only be used to estimate national-level data of each ENNS survey year (2018, 2019, and 2021). Alternatively, other than estimating provincial or domain-level data, Provincial Sampling Weights can also be used for the national-level data estimation given that the ENNS survey years are combined.

	Stata versions 15 and 16 were used to generate descriptive statistics including mean, median and percentage, range, confidence intervals, design effect, and coefficient of variation. Since the third and last year of the ENNS was disrupted in 2020, data from the 2018 and 2019 ENNS were pooled to increase the precision of national-level estimates and to further improve comparability vis-a-vis results from previous NNS surveys.
Notes The researchers who collected the survey data were grouped into sub-teams. In 2018 and 2019 ENNS, each sub-team was composed of two team leaders and eight members. However, the 2021 ENNS sub-teams only consist of one team leader and five members. These sub-teams stayed in the survey area for at least one week to perform the tasks, including the location of the sample households, data collection, editing, and data transmission and transfer to the next area. For the 2021 ENNS, all the mandatory health and safety protocols as directed by the Department of Health and Local Government Units (LGUs), such as wearing face masks and face shields, conducting physical distancing, and frequent hand washing or sanitizing of hands, were strictly implemented, to protect the health of both the researcher and the respondent against the COVID-19.	

Variable Label and Definition			
Household Membership and Demographic Information			
Variable Name	Variable Label	Value Labels/Variable Definition	
regcode	Name of Regions	Refers to the different regions in the country which were coded accordingly:	
	Codes given to Regions	1	Ilocos
		2	Cagayan Valley
		3	Central Luzon
		5	Bicol
		6	Western Visayas
		7	Central Visayas
		8	Eastern Visayas
		9	Zamboanga Peninsula
		10	Northern Mindanao
		11	Davao Region
		12	SOCCSKSARGEN
		13	National Capital Region
		14	Cordillera Administrative Region
		15	ARMM
		16	Caraga
		41	CALABARZON
42	MIMAROPA		
provhuc	Province and HUCs Level	Refers to the different provinces and HUCs that were covered in the ENNS:	
	[Sulu, was not covered due to peace and security]	1	Ilocos Norte
		2	Ilocos Sur
		3	La Union

enns_year	ENNS Year	ENNS Years 2018 ENNS conducted from 2018 to 2019 2019 ENNS conducted from 2019 to 2020 2021 ENNS conducted from 2021 to 2022
hhnum	Household Number (Unique household identifier; merging variable)	A unique number code is assigned to each of the sample households. Each individual belonging to the same household has a similar household identifier. This variable was used to merge variables from different nutrition survey components.
member_code	Member Code (Unique identifier; merging variable)	It is a pre-coded membership number of household members.
fwgti_natl_var	Sampling Weights National	Product of the base weights, non-response adjustment, and post-stratification adjustment for yearly national-level estimation (2018, 2019, and 2021)
fwgti_prov	Sampling Weights Provincial	Product of the base weights, non-response adjustment, and post-stratification adjustment for provincial-level estimation
rep_natl	ENNS Replicate Codes	Replicate codes assigned to PSA domains for national-level estimation (1,2,...,24)
rep_prov	MS Replicate Codes	Replicate codes assigned to PSA MS EAs/PSU for domain/provincial-level estimation (1,2,...,16)
ms_psucode	MS PSU Codes	PSU code based on the PSA Master Sample (MS)
age	Age in Years	The exact age of each household member in years as of his/her last birthday.
sex	Sex	Refers to the sex of the household member 1 Male 2 Female

Variable Label and Definition		
Household Membership and Demographic Information		
Variable Name	Variable Label	Value Labels/Variable Definition
csc	Civil Status Code	Refers to the civil status of the household member 1 Single 2 Married 3 Widow/Widower 4 Separated/Annulled/Divorced 5 Common-Law/Live-in 6 Unknown
psc	Physiological Status Code	Present physiological status or condition of all female members. 0 Non-pregnant/Non-lactating female members 1 Pregnant, 1 month 2 Pregnant, 2 months 3 Pregnant, 3 months 4 Pregnant, 4 months 5 Pregnant, 5 months 6 Pregnant, 6 months 7 Pregnant, 7 months 8 Pregnant, 8 months 9 Pregnant, 9 months 10 Lactating, 0- 6 months 11 Lactating, 7-12 months 12 Lactating, over 1 year 99 Male Member
rhc	Relation to Household Head Code	The relationship of each household member to the household head. 1 Head 2 Husband/Wife 3 Son 4 Daughter 5 Stepson 6 Stepdaughter 7 Son-in-law 8 Daughter-in-law 9 Grandson 10 Granddaughter 11 Father 12 Mother 13 Brother 14 Sister 15 Uncle 16 Aunt 17 Nephew 18 Niece 19 Other Relatives 20 Non-relative 21 Boarder 22 Domestic Helper

Variable Label and Definition		
Household Membership and Demographic Information		
Variable Name	Variable Label	Value Labels/Variable Definition
educ	Highest Educational Attainment	The highest grade/year of formal schooling completed by each member, not the years attended by members 3 years old and above. 0 No Grade Completed 1 ECCD/Nursery 2 Kinder 3 Preparatory 11 Elementary, Grade 1 12 Elementary, Grade 2 13 Elementary, Grade 3 14 Elementary, Grade 4 15 Elementary, Grade 5 16 Elementary, Grade 6(If with Grade 7) 17 Elementary Graduate 21 1st Year HS/Grade 7 22 2nd Year HS/Grade 8 23 3rd Year HS/Grade 9 24 4th Year HS/ Grade 10 25 Grade 11 26 Grade 12 27 High School Graduate 41 1st Year Vocational 42 2nd/3rd Year Vocational 43 Graduate Vocational 51 1st Year College 52 2nd Year College 53 3rd Year College 54 4th/5th Year College 55 College Graduate 66 Master's Graduate 67 PhD Graduate 77 Alternative Learning System (ALS) 81 Special Education (SPED) 82 Arabic schooling 83 Others 99 Not Applicable (less than 3 yrs. old/not schooling yet) 9999 Missing
haswork	Current Work	Work status of the household member in the past six (6) months. 0 No Occupation 1 Housekeeper 2 Student 3 Pensioner 11 With Job/Business 99 Not Applicable (less than 10 years old)

Variable Label and Definition		
Household Membership and Demographic Information		
Variable Name	Variable Label	Value Labels/Variable Definition
occup	Present Occupation [based on 2012 Philippine Standard Occupational Classification Group]	The type of work a person does to earn his/her living in the past six (6) months. 0 Armed forces occupations 1 Managers 2 Professionals 3 Technicians and associate professionals 4 Clerical support workers 5 Service and sales workers 6 Skilled agricultural, forestry, and fishery workers 7 Craft and related trades workers 8 Plant and machine operators and assemblers 9 Elementary occupations 88 Other Occupation Not Stated/Not Elsewhere Classified 89 No Occupation/Pensioner/Full-time Student 99 Not Applicable (less than 10 yrs. old)
wrkplace	Place of Work	Refers to the usual place where each earning household member works. 0 At home 1 Local, away from home 2 Abroad 9 Not Applicable (without work) 99 Not Applicable (less than 10 yrs. old)
urbanrural	Place of Residence	Place of residence 1 Rural 2 Urban
is	Interview status	Individual interview status 0 Non-covered 1 Covered
